

# CAPABILITY STATEMENT

**Cover Six Solutions, LLC** is a distinguished leader in cybersecurity, specializing in delivering customized solutions to safeguard organizations' digital assets, including firewalls, web content filtering, VPN/remote access, and network infrastructure. With over 18 years of experience, we excel in managing large-scale projects and ensuring seamless team coordination. Our CEO, Richard McQuitery, leverages his extensive U.S. Army cybersecurity background to reinforce our commitment to advanced security practices. As a proud Service-Disabled Veteran-Owned Small Business (SDVOSB) we're ready to safeguard our nation from a cyber security perspective.

## CORE COMPETENCIES

- **Network Security Management:** Expertise in managing and securing NIPR/SIPR networks and ensuring IT compliance across various security protocols.
- **Cybersecurity Solutions:** Specialized in firewall management, virus defense, and IT security policy implementation.
- **System and Network Administration:** Skilled in troubleshooting, system backups, and maintaining IT infrastructure for optimal performance.
- **Project Management:** Strong capabilities in overseeing large-scale IT projects from planning through execution.
- **Training and Technical Support:** Providing comprehensive technical support and training to enhance system reliability and staff proficiency.

## PAST PERFORMANCE

**U.S. Army NEC Brussels (January 2022 - July 2023):** Managed network services, overseeing NIPR/SIPR networks across multiple sites, resolved IT incidents using ITSM-Remedy, and handled system installations and Active Directory management. Demonstrated excellence in operational assistance and advisory services, ensuring seamless IT operations across military bases.

**U.S. Air Force Joint Air Operations Center (September 2019 - July 2021):** Provided IT and network support for critical command systems, coordinated the installation and maintenance of network hardware and software, and enforced IT security protocols. Managed troubleshooting and technical assistance, contributing to the security and functionality of a \$34M weapon system.

**Bureau of Labor Statistics (November 2015 - September 2019):** Administered network security measures including firewalls, VPN, and remote access systems within a LAN-based environment. Implemented emergency firewall rules and performed system backups, significantly enhancing the IT infrastructure's security and reliability.
